

troughs and its seasonal variation is inverse v shaped. The paper also discussed the policy prescription. Emphasis on sustainable flood management practices through government inclusive target planning is utmost important.

#### **Acknowledgment:**

The authors are grateful for kind support from Lincoln University management for supporting and encouragement to complete the present article.

#### **Funding:**

The Authors declare that they do not have any funding or grant for the manuscript.

#### **Conflict of Interest:**

The authors declare that they do not have any conflict of interests that influence the work reported in this paper.
